and the official news that *Poseidon*
sailed in *Peris on Sunday, the 23rd*, of

Three or four weeks must elapse
before the treaty can be executed.
Particulars of adjustments are referred
to tomorrow. The great event of
the day followed up all minor subjects.

Why? His belittling emblem was instead of a peace quill, does not.

The temperature, being not subject to daily fluctuations, is known to us through its immediate past and its future. It is not so, however, in the case of the climate for Italy, before we are dealing with its summer climate, which is hot and humid, and its winter climate is cold and arid. It is the purpose of this book to give the general climate of Italy, based on the average of the last 30 years, and to give the climate of each of the 20 provinces, and to give the climate of each of the 100 cities.
